Norman, becomed consultant of Greenville, S.C.

At the suggestion of Mothers. the trustess met vith him and Reman basically to find out whose some some some sultant could furnish the beepital. For long range planning purposes, Norman has been employed by the public because of Leurol and Hardesbury in this area. Both Marines and Norman

had two recess involving factoral assistance which they could wavel. The cimplest, appointly, would be to coply for a local for planning purposes condingent on the county performing the work, in which case, Uncle Som would be rejected the certain cost. The other property would not commit the supervicers to more than one-dilind Currently, Waveland has a of the cost but they would have to pay this third whether they or not. In addition, following the easier route would not in the end result cost the county the full emount. Under the Hill-Burton Act, the U.S. government would still pay two-thirds of the total

cost including the survey cost. In line with the projected need for a 150 bed hospital. Norman quoted average figures showing that per 600-650 perple one hospital bad is madad. On the assumption that the county's population by 1970 boodroddgien eds ni ed bluow of 100,000, a 130 bed hospital cauld be indicated.

In codition, no one could give an affirmative prognastication of the increased need for hospital beds which may occur when medicare goes into effect on July 1. However, all present indicared a belief that the nev ing planding trees and shrubs, bealth program would substanconsumued as concrete border dolly increase the demand for begins beds. Trustes J.C.

"Ohm Sweet Ohm"

This initial cause of the November 9th blackout in the northeastern United States has been determined. Chairman Joseph C. Swidler has made his report to President Johnson, along with Federal Potter Commission recommendations for averting further massive outages and their consequences. A congressional investigation is now under way. No one im, or connected with, the electric industry needs to be reminded of the deadly serious problems raised by this event—or the need for thoughtful actions to prevent a recurrence of such a catastrophe.

However, someone far removed from the blackout (in California) and the industry (a nevspaper humorist) might express an opinion on the blackout in a lighter vein. And no matter how serious similian is, it is not accessarily so ter-The is to exclude the lighter touch. The following is a reprint of a column which

They have found no such signs; instead, the first of both man and supplies southward had been stapped up to the mandamen, taking edvantage of the bombing hall to prepare for introdifying

This evidence has brought removed demands from Perform military strategiers that when full-scale bounding to recommed it must be extended to Hanol and Halphong. Ambanacter Hany Cabor Lodge in Salger has joined in this prescure on the White House, arguing that any bope of peace must be deferred todistinctly.

And Con. William Westmoreland has reported to the Pantegon that our air attacks on bridges and railreads in Narth Vizz Nam are not anywhere mar enough; they have not earlievely crippled the supply limes to South Viet News, and constituting more directic and more constitue must be done. Humphrey's proposal

Vice President Humphrey held some significant backstops talks with Asian leaders who amended the recom incommonton of Philippine President Marcon.

The most striking idea that Humphrey discussed the the possibility of giving the communists a taste of their own medicine by mounting guerrilla attacks against North Vist Nam. Lacar, large-scale guerrilla operations might even be amempted inside Red Chine itself.

U.S. troops would not be used, only Asians, prederably anticommunists notives who spoke the language and knew the

Humphrey must still sell President Johnson on his plan. of course. But it has much in its favor.

For weeks, this writer marched with a bond of Chinese guerrillas during World War II, and saw what poorly armed but brave and determined men could do inside China. They corried out successful attacks not only against the Japanese but also against the communists who rule China now.

On Formosa today are anti-communist Chinese from every corner of mainland Chian. They could be infiltrated by air drop, by sampan, on foot, or by mule over mountain trails the Chinese heartland. They could be supplied not only with arms and ammunition but with stocks of food to win the friendship of the hungry peasants.

And in Tibet, Inner Mongolia, and Sinking, indeed deep in China itself, are large minorities waiting only for leadership, arms and food to attempt the battle to throw off their shackies.

If we could help them, as Humphrey proposes, it might be the most effective way of all not only to end the war in Vict Nam but to rid China of its balligerem communist rulers.

Bobby Baker cover-up

.The grand jury which indicated Bobby Baker for income tax evasion, like the senate investigation earlier, completely ignored the men who set the example for him.

Yet Bobby Baker, who came to the senate as a 14-year-old page boy, simply adopted its standards. He practiced law, made business deals out the back door of the senate as many senators

The Senate Rules Committee sent investigators into 32 states and two foreign countries chasing down information on Beliby Baker. They interviewed over 200 witnesses and took sworn

testimony from 60, some of it involving senators. Yet the Rules Committee never asked a single senator a single question. Despite all the political recriminations over the Baker case, a remarkable bi-partisan spirit prevailed on the question of shielding senators. The same was true of the grand jury which indicaed Baker, it redused to listen to tesdmony against any senators.

Thus the full every of the Bobby Baker case has not been told-and chances are it never will be unless Batter sufficiently docides to stop protecting his teachers.

The fact is that the Ivy League states get their electricity from a system called CANUSE (Canada-United States-Eastera connection), an intricate interconnection complex in which power plants feed what is called electricity, or power, into a lot of wires called a grid that shoots the

L&N bridge start slated this spring

This spring is the latest construction date for the Louisville and Nashville Railroad Co.'s proposed concrete and smal bridge over the Bay of Sz. Louis.

Plans were announced in January last year for the \$4.9 million structure to replace the timber-pile soon erected in 1899. At that time the railroed said it hoped to start building last summer.

News of the new date came in a letter from L and N Division Engineer W.H. Barber to the Harrison County board of supervisors requesting a grade Herderson Point made necessory by the planned work.

Ohm Sweet Ohm...

(Cont. from Page 3-A.)

New York like Four Star Hennessy suddealy charged down on the sleepy hamlet of Cornwall, Ontario. A revolting development.

If that slug had hit, they'd still be looking for the town. That much power sends lightning from the ground up into the clouds. But quick-thinking technicians at a suburban control center spotted this tidal wave of volts, kilocycles, and wattnot and flipped a switch to save the city.

Which of course sent that massive surge of electricity paddling back in CANUSE, through the Canadian system, across the southern Ontario network, and back into New York, like a motorist trying to get off the freeway.

The current shot through southern Illigone was \$266,980.41. nois, backtracked into Georgia, and stopped off briefly to visit relatives at the TVA. Then on it went, rebounding

Mr. Smith Has Gone to Jackson

...and so have 173 other men and women representing every county, community and corner of the State of Mississippi.

They are the Mississippi State Legislature which this month goes into its 136th biennial session. They will be concerned with legislation designed to guide the destiny, protect the interests and promote the general wetare of all the people of Mississippi.

Through your vote, you asked them to serve you. They sought the job because of a deep feeling of devotion to, and a desire to serve the causes of, their fellow Mississippians. Their pay for this service will hardly offset their expenses. id certainly will not repay them for the time away from their business, farm or profession.

You can help them by keeping informed on the issues you face through them and by expressing to them your opinions concerning those issues. In this way you, too, will have gone to Jackson with Mr. Smith.
